

# Knowledge Organiser - The Stone Age

The Stone, Bronze and Iron Ages were a long, long time ago. The Stone Age in Britain was when humans first properly settled in Britain and was nearly 1 million years ago. The Bronze Age followed the Stone Age and began around 4000 years ago. The Iron Age followed the Bronze Age and began around 3000 years ago. All of these time periods make up prehistoric Britain and were the years before there were any written records. Written records in Britain only began around 180 years ago. This means that for almost 1 million years, humans were living in Britain and they did

Around 1 million to 4000 years ago. | Around 4000 to 3000 years ago. | Around 3000 to 180 years ago.

At the start of the Stone Age, people were hunter-gatherers who needed to move around to find food. There were no permanent settlements and people	By the end of the Stone Age, people had learnt how to farm. They built more permanent settlements because they did not need to move around to find	In Bronze Age, the people of Britain learnt how to make bronze and extract other metals from rocks. They learnt skills from the people migrating from Europe	In the Iron Age people started to use Iron to make things. There were more conflicts between the tribes of people and so they built hillforts to
